

CDF Checklist of Galapagos Thrips

Mark S. Hoddle, Laurence Mound, Stewart B. Peck

Last updated: 18 Nov 2012

Abstract

This Checklist of Galapagos Thrips includes a total of all 84 taxa reported from the Galapagos Islands.

For each name, detailed information is provided: its Galapagos distribution in islands groups or bioregions generated from the specimen records, comments about the taxonomy (especially synonyms), the origin (native and introduced), taxon status (accepted vs. rejected records) and relevant literature references.

Introduction

This publication lists all species of Galapagos Thrips currently known.

Thrips are tiny, slender insects with fringed wings. They feed on a large variety of both plants and animals by puncturing them and sucking their contents. Many are considered pests because they feed on plants with commercial value. Others feed on insects or mites and are therefore often considered beneficial. Still others feed on fungal spores or pollen. Around 5,000 species have thus far been described. They are generally tiny insects (< 1 mm) and poor flyers, but can drift long distances in the wind.

In a 1967 survey of Galapagos thrips, three families, six genera, and eight species were recorded. Fifty species are currently known, of which 33 are described and nameable here. The Aeolothripidae is represented by one predaceous species; Merothripidae with one fungivorous species; Thripidae with 18 phytophagous species and 3 predaceous species; and the Phlaeothripidae with seven known phytophagous species and 19 species that feed on fungal hyphae or spores, on break-down products associated with fungal infestations, or prey on other insects.

Methods

This checklist of all known Galapagos Thrips is automatically generated using the online database of the Charles Darwin Foundation Galapagos Species Checklist.

All CDF Galapagos Species Checklists represent the synthesis of many different records: literature citations, data from previously unpublished reports (grey literature), specimen records of natural history collections located in Galapagos and all over the world. To the best of their knowledge authors of the individual checklists revised all available data. When new information becomes available, the taxonomy of a group changes or new species are discovered, the CDF online database and thus this publication becomes updated.

For many poorly known species groups the higher taxonomic classification still regularly changes according to how our knowledge about species being related changes. In many well known groups the phylogeny is somewhat stable, but to avoid confusion, in particular for groups where taxonomic changes are frequent, all checklists presented here are sorted alphabetical according to genus

name and specific epithet. Please refer to the website for the currently accepted taxonomic hierarchy of each group.

Please be aware that the distribution presented here is automatically generated from specimen records and does not always accurately reflect the known distribution for all species.

For marine species, the distribution generally refers to the five main bioregions of the archipelago (Far Northern, Northern, Western, South Eastern and the Elisabeth Bay Bioregion). For the terrestrial species more than 120 islands, islets and small rocks have been aggregated into Islands Groups, thus, for example, the island group "Santa Cruz" includes smaller islands like Santa Fé, Plaza Norte, Plaza Sur, Baltra, Daphne Mayor, Daphne Minor, and others.

IUCN red-list assessments presented here may deviate from the global IUCN list for the following reasons:

- for well known species groups like vascular plants or vertebrates updates proposed to the IUCN are shown instead of the outdated, but currently accepted status;
- for poorly known species groups (e.g., lichenized fungi) a general assessment is currently not possible and the list presented here is a regional red-list list for Galapagos archipelago.

Numbers of the species included in this list are auto-generated. Adding up the number of species in each category will not always equal the total number indicated. Some species have insufficient data to be categorized while others (e.g., category eradicated) will not be included in the total.

Results

Names of taxa included in this checklist: 84 (54 accepted, 25 unidentified taxon, 3 doubtful, 2 problematic).

Origin of the taxa included: 2 accidental, 8 questionable accidental, 27 questionable native, 16 indigenous.

1. *Adraneothrips sp.*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: No Data.

Galapagos Distribution: Santa Cruz, Santiago.

References: Hoddle, M.S. et al. (2011).

2. *Adraneothrips sp. (pale species)*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Santa Cruz, Santiago.

References: Peck, S.B. et al. (2001).

3. *Adraneothrips tibialis* (Hood, 1914)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Questionable Accidental.

Galapagos Distribution: Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

4. *Allothrips megacephalus mexicanus* Stannard, 1955

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Santa Cruz, Santa Fé.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

5. *Allothrips sp.*
Taxon status: Taxon not identified to species, subspecies, form or variety.
Origin: No Data.
Galapagos Distribution: Isabela, Marchena.
References: Hoddle, M.S. et al. (2011).
6. *Amphibolothrips astutus* Cott, 1956
Taxon status: Taxonomic status unresolved or unrevised.
Origin: No Data.
Galapagos Distribution: Unknown.
References: Bailey, S.F. et al. (1967), Linsley, E.G. et al. (1977).
7. *Androthrips ramachandrai* Karny, 1926
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: No Data.
Galapagos Distribution: Santa Cruz.
References: Hoddle, M.S. et al. (2011).
8. *Antillothrips cingulatus* (Hood, 1919)
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: Native, Indigenous.
Galapagos Distribution: Floreana, Santa Cruz.
References: Peck, S.B. et al. (2001).
9. *Apterygothrips sp.*
Taxon status: Taxon not identified to species, subspecies, form or variety.
Origin: No Data.
Galapagos Distribution: Isabela, Santiago.
References: Hoddle, M.S. et al. (2011).
10. *Arorathrips mexicanus* (Crawford, 1909)
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: No Data.
Galapagos Distribution: San Cristóbal.
References: Hoddle, M.S. et al. (2011).
11. *Baileyothrips limbatus* (Hood, 1935)
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: Native, Indigenous.
Galapagos Distribution: Marchena, Pinta.
References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).
12. *Bamboosiella cingulata* (Hood, 1919)
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: No Data.

Galapagos Distribution: Floreana, Isabela, San Cristóbal, Santa Cruz.

References: Hoddle, M.S. et al. (2011).

13. *Bregmatothrips venustus* Hood, 1912

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: No Data.

Galapagos Distribution: San Cristóbal.

References: Hoddle, M.S. et al. (2011).

14. *Caliothrips insularis* (Hood, 1928)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

15. *Caliothrips phaseoli* (Hood, 1912)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Native, Indigenous.

Galapagos Distribution: Fernandina, Floreana, Isabela, Pinta, Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

16. *Caliothrips punctipennis* (Hood, 1912)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Native, Indigenous.

Galapagos Distribution: Isabela.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

17. *Carathrips rufescens* (Hood, 1942)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Fernandina, Floreana, Isabela, Marchena, Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

18. *Chaetanaphothrips orchidii* (Moulton, 1907)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Isabela.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

19. *Elixothrips brevisetis* Bagnall, 1921

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: No Data.

Galapagos Distribution: Santa Cruz.

References: Hoddle, M.S. et al. (2011).

20. *Frankliniella bruneri* (Watson, 1926)
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: No Data.
Galapagos Distribution: Floreana, Isabela, Santa Cruz.
References: Hoddle, M.S. et al. (2011).
21. *Frankliniella brunnea* Priesner, 1932
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: No Data.
Galapagos Distribution: Floreana, Santa Cruz.
References: Hoddle, M.S. et al. (2011).
22. *Frankliniella citripes* Hood, 1916
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: No Data.
Galapagos Distribution: Santa Cruz.
References: Hoddle, M.S. et al. (2011).
23. *Frankliniella insularis* (Franklin, 1908)
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: No Data.
Galapagos Distribution: Floreana, San Cristóbal, Santa Cruz.
References: Hoddle, M.S. et al. (2011).
24. *Frankliniella occidentalis* (Pergande, 1895)
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: No Data.
Galapagos Distribution: Floreana, Santa Cruz.
References: Hoddle, M.S. et al. (2011).
25. *Frankliniella rodeos* Moulton, 1933
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: Introduced, Questionable Native.
Galapagos Distribution: Pinzón, Santa Cruz.
References: Bailey, S.F. et al. (1967), Hoddle, M.S. et al. (2011), Linsley, E.G. et al. (1977), Peck, S.B. et al. (1998), Peck, S.B. et al. (1996), Peck, S.B. et al. (2001).
26. *Frankliniella schultzei* (Trybom, 1910)
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: Native, Indigenous.
Galapagos Distribution: Floreana, Isabela, Santa Cruz, Wolf.
References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).
27. *Frankliniella sp. (brown)*
Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: Introduced, Questionable Accidental.

Galapagos Distribution: Santa Cruz, Santiago.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

28. *Frankliniella sp. (pale yellow)*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: Introduced, Questionable Accidental.

Galapagos Distribution: Española, Fernandina, Floreana, Isabela, Pinta, Santa Cruz, Santiago.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

29. *Frankliniethrips vespiformis* (Crawford, 1909)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Native, Indigenous.

Galapagos Distribution: Isabela, Pinzón, San Cristóbal, Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

30. *Gastrothrips cf. callipus*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Española, Pinta, Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

31. *Gastrothrips harti* (Hood, 1913)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Española, Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

32. *Gastrothrips sp.*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

33. *Gynaikothrips uzeli* (Zimmermann, 1900)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Accidental.

Galapagos Distribution: San Cristóbal, Santa Cruz.

References: Causton, C. et al. (2008), Hoddle, M.S. et al. (2011).

34. *Haplothrips gowdeyi* Franklin, 1908

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Questionable Accidental.

Galapagos Distribution: Fernandina, Floreana, Genovesa, Isabela, Pinzón, San Cristóbal, Santa Cruz, Santiago.

References: Bailey, S.F. et al. (1967), Hoddle, M.S. et al. (2011), Linsley, E.G. et al. (1977), Peck, S.B. et al. (1998), Peck, S.B. et al. (1996), Peck, S.B. et al. (2001).

35. *Haplothrips sonorensis* Stannard, 1956

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Native, Indigenous.

Galapagos Distribution: Santa Cruz.

References: Bailey, S.F. et al. (1967), Linsley, E.G. et al. (1977), Peck, S.B. et al. (2001).

36. *Haplothrips sp.*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Floreana, Isabela, San Cristóbal, Santa Cruz.

References: Hoddle, M.S. et al. (2011).

37. *Haplothrips sp. 1*

Taxon status: Taxon not identified to species, subspecies, form or variety.

This record of Bailey was not confirmed, but several species of Karnyothrips were collected, and this was once treated as a subgenus of Haplothrips (Stannard, 1968: 429)

Origin: Introduced, Questionable Native.

Galapagos Distribution: Unknown.

References: Peck, S.B. et al. (2001).

38. *Heliothrips haemorrhoidalis* (Bouché, 1833)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Native, Indigenous.

Galapagos Distribution: Floreana, Isabela, Pinzón, San Cristóbal, Santa Cruz, Santiago.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (1998), Peck, S.B. et al. (2001).

39. *Hoplandrothrips sp.*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Floreana, Isabela, Pinta, Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

40. *Hoplandrothrips symmetricus* Hood, 1942

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: No Data.

Galapagos Distribution: Isabela.

References: Hoddle, M.S. et al. (2011).

41. *Hoplothrips angusticeps* (Hood, 1908)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Native, Indigenous.

Galapagos Distribution: Fernandina, Floreana, Isabela, San Cristóbal, Santa Cruz, Santiago.

References: Hoddle, M.S. et al. (2011), Linsley, E.G. et al. (1977), Peck, S.B. et al. (2001).

42. *Idiothrips floridanus* Hood, 1938

Taxon status: Taxonomic status unresolved or unrevised.

Origin: No Data.

Galapagos Distribution: Unknown.

References: Baijnath, H. et al. (1975), Bailey, S.F. et al. (1967), Linsley, E.G. et al. (1977).

43. *Karnyothrips caliginosus* Hood, 1938

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Isabela, Santiago.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

44. *Karnyothrips cf. longiceps* (Hood, 1908)

Taxon status: The identification of this taxon or its occurrence in Galapagos is doubtful.

Origin: Introduced, Questionable Accidental.

Galapagos Distribution: Santa Cruz, Santiago.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (1998), Peck, S.B. et al. (2001).

45. *Karnyothrips flavipes* Jones, 1912

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: No Data.

Galapagos Distribution: Isabela.

References: Hoddle, M.S. et al. (2011).

46. *Karnyothrips melaleucus* (Bagnall, 1911)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Native, Indigenous.

Galapagos Distribution: Fernandina, Floreana, Genovesa, Isabela, Marchena, Pinta, San Cristóbal, Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

47. *Karnyothrips sonorensis* Stannard, 1956

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: No Data.

Galapagos Distribution: Santa Cruz.

References: Hoddle, M.S. et al. (2011).

48. *Karnyothrips sp.*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: No Data.

Galapagos Distribution: Floreana.

References: Hoddle, M.S. et al. (2011).

49. *Leptothrips cf. yaqui* Hood, 1909
Taxon status: The identification of this taxon or its occurrence in Galapagos is doubtful.
Origin: Introduced, Questionable Native.
Galapagos Distribution: Española, Fernandina, Pinta, Santa Cruz.
References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).
50. *Leptothrips sp.*
Taxon status: Taxon not identified to species, subspecies, form or variety.
Origin: No Data.
Galapagos Distribution: Española, San Cristóbal, Santa Cruz.
References: Hoddle, M.S. et al. (2011).
51. *Liothrips sp.*
Taxon status: Taxon not identified to species, subspecies, form or variety.
Origin: Introduced, Questionable Native.
Galapagos Distribution: San Cristóbal.
References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).
52. *Macrophthalthothrips helenae* Hood, 1934
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: Native, Indigenous.
Galapagos Distribution: Isabela, San Cristóbal, Santa Cruz.
References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).
53. *Merothrips floridensis* Watson, 1927
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: No Data.
Galapagos Distribution: Isabela.
References: Hoddle, M.S. et al. (2011).
54. *Merothrips morgani* Hood, 1912
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: Introduced, Questionable Accidental.
Galapagos Distribution: Isabela, Santa Cruz.
References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (1998), Peck, S.B. et al. (2001).
55. *Neohydatothrips gracilipes* Hood, 1924
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: No Data.
Galapagos Distribution: Floreana, Isabela, San Cristóbal.
References: Hoddle, M.S. et al. (2011).
56. *Neohydatothrips portoricensis* (Morgan, 1925)
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: Introduced, Accidental.

Galapagos Distribution: Isabela.

References: Causton, C. et al. (2008), Hoddle, M.S. et al. (2011).

57. *Neohydatothrips sp.*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Floreana, Isabela, Marchena, Pinta, Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

58. *Neohydatothrips williamsi* (Hood, 1928)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Native, Indigenous.

Galapagos Distribution: Floreana, Isabela, Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

59. *Nesothrips lativentris* (Karny, 1913)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Native, Indigenous.

Galapagos Distribution: Fernandina, Floreana, Isabela, Pinta, San Cristóbal, Santa Cruz, Santiago.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

60. *Plesiothrips brunneus* Hood, 1936

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Isabela, Santa Cruz, Santiago.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

61. *Plesiothrips perplexus* (Beach, 1896)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Native, Indigenous.

Galapagos Distribution: Floreana, Isabela, Santa Cruz, Santiago.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

62. *Plesiothrips sp.*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: No Data.

Galapagos Distribution: Floreana.

References: Hoddle, M.S. et al. (2011).

63. *Pygmaeothrips angusticeps* Hood, 1908

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: No Data.

Galapagos Distribution: Floreana, San Cristóbal, Santa Cruz.

References: Hoddle, M.S. et al. (2011).

64. *Rhamphothrips sp.*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: No Data.

Galapagos Distribution: Santa Cruz.

References: Hoddle, M.S. et al. (2011).

65. *Scirtothrips panamensis* Hood, 1935

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Native, Indigenous.

Galapagos Distribution: Fernandina, Marchena, Santa Cruz, Santiago.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

66. *Scirtothrips sp.*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: No Data.

Galapagos Distribution: Isabela.

References: Hoddle, M.S. et al. (2011).

67. *Scirtothrips sp. (short PA setae)*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Floreana, Isabela.

References: Peck, S.B. et al. (2001).

68. *Scolothrips pallidus* (Beach, 1896)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Santa Cruz.

References: Bailey, S.F. et al. (1967), Hoddle, M.S. et al. (2011), Linsley, E.G. et al. (1977), Peck, S.B. et al. (1998), Peck, S.B. et al. (1996), Peck, S.B. et al. (2001).

69. *Scolothrips sexmaculatus* (Pergande, 1890)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Pinzón.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

70. *Scolothrips sp.*

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Floreana, Isabela, Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

71. *Scopaeothrips unicolor* Hood, 1912

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Isabela.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

72. *Selenothrips rubrocinctus* (Giard, 1901)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Native, Indigenous.

Galapagos Distribution: Floreana, Isabela, San Cristóbal, Santa Cruz, Santiago.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

73. *Stephanothrips occidentalis* Hood & Williams, 1925

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: No Data.

Galapagos Distribution: San Cristóbal.

References: Hoddle, M.S. et al. (2011).

74. *Strepterothrips floridanus* (Hood, 1938)

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: Introduced, Questionable Accidental.

Galapagos Distribution: Española, Floreana, Isabela, Marchena, San Cristóbal, Santa Cruz.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (1998), Peck, S.B. et al. (2001).

75. *Strepterothrips* sp.

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: Introduced, Questionable Native.

Galapagos Distribution: Española, Isabela, Marchena, Santa Cruz, Santiago.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

76. *Thrips palmi* Karny, 1925

Taxon status: Accepted name; taxon occurs in Galapagos.

Origin: No Data.

Galapagos Distribution: Santa Cruz.

References: Hoddle, M.S. et al. (2011).

77. *Thrips* sp. (1 male)

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: Introduced, Questionable Accidental.

Galapagos Distribution: Isabela, San Cristóbal.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).

78. *Thrips* sp. 1

Taxon status: Taxon not identified to species, subspecies, form or variety.

Origin: No Data.

Galapagos Distribution: Floreana.

References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (1998).

79. *Thrips tabaci* Lindeman, 1889
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: No Data.
Galapagos Distribution: Santa Cruz.
References: Hoddle, M.S. et al. (2011).
80. *Trachythrips astutus* Cott, 1956
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: Introduced, Questionable Native.
Galapagos Distribution: Santa Cruz.
References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).
81. *Trachythrips cf. watsoni* Hood, 1929
Taxon status: The identification of this taxon or its occurrence in Galapagos is doubtful.
Origin: Introduced, Questionable Native.
Galapagos Distribution: Isabela.
References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).
82. *Trichinothrips sp.*
Taxon status: Taxon not identified to species, subspecies, form or variety.
Origin: Introduced, Questionable Native.
Galapagos Distribution: Pinta, Santa Cruz.
References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).
83. *Williamsiella morgani* (Hood, 1941)
Taxon status: Accepted name; taxon occurs in Galapagos.
Origin: Introduced, Questionable Native.
Galapagos Distribution: Isabela, Pinzón.
References: Hoddle, M.S. et al. (2011), Peck, S.B. et al. (2001).
84. *Zaliothrips sp.*
Taxon status: Taxon not identified to species, subspecies, form or variety.
Origin: No Data.
Galapagos Distribution: San Cristóbal.
References: Hoddle, M.S. et al. (2011).

Acknowledgements

We are grateful for the financial report received for this project. Please refer to the website (www.darwinfoundation.org/datazone/checklist/) for a detailed list of all our donors.

This checklist would not be possible without adjunct and collaborating scientists, and volunteers of the Charles Darwin Foundation. The following scientists and volunteers have contributed to the CDF Checklist of Galapagos Thrips: Sandra Abedrabbo, León L. Baert, Fabián Bersosa, Ruth Boada, Charlotte Causton, Germania Estévez, Lilian Guzmán, Henri W. Herrera, María T. Lasso, Maria Piedad Lincango, E. G. Linsley, Yale Lubin, Alejandro Mielles, Renato Oquendo, Helmut W. Rogg, Lázaro Roque-Álbelo, Leslie Usinger.

Disclaimer

The Charles Darwin Foundation Galapagos Species Checklist is a continuously updated list of all species currently known from the Galapagos Islands and reflects up-to-date knowledge compiled by scientists of the Charles Darwin Foundation (CDF) in collaboration with experts from around the world. CDF shares this data publicly and invites comments, corrections and additions.

Please do not hesitate to contact us; your input is very welcome. However, please understand that additions, changes, and corrections will be posted at periodic intervals after thorough cross-referencing of all new data. As an independent international scientific organization, the Charles Darwin Foundation relies on funding from donors who support our work. Please contact us at datazone@fcdarwin.org.ec if you would like to support the Charles Darwin Foundation Galapagos Species Checklist and help make knowledge of Galapagos biodiversity more widely available.
